

FRONT ELEVATION

SITE

In 1996 Princeton had a Ford Dealership located in the downtown area. The dealer was directed by Ford to build a new dealership near the current Walmart located West of Highway 41.

Architecture Plus was hired to develop the design and prepare the construction documents and specifications for bidding the facility.

Although the drawings were completed and ready for bidding, Ford determined that a dealership in Princeton was not necessary and closed the dealership.

Location: Princeton, Indiana

Size: 18,300 square feet

SIDE ELEVATION

PRESENTATION

Working with Hudson Motors of Madisonville, KY, Architecture Plus designed a new Hyundai Dealership for their Evansville location.

Because site selection is so critical for an automotive retailer, Architecture Plus worked closely with Woodward Development during the site selection process. Sites were screened for their traffic flow and patterns, the site lines which would feature product displays from the street, and the site's relationship to other automotive dealers.

The design evolved into an open concept plan that welcomed the buyer and promoted the cars built by Hyundai.
